Direct utilities to transition homes and businesses off gas.

This message is to show my support for the Building Decarbonization chapter of the Energy Commission's Integrated Energy Policy Report (IEPR). I am urging the California Energy Commission to direct utilities to transition homes and businesses off gas.

Fracking is dangerous. Gas is polluting and it's dangerous. We need to get it out of our energy system, and especially out of our homes and buildings.

Solar is an abundant energy source in California. We need to promote it more heavily and make sure the majority of households in our state are getting off the grid. It is much more efficient for every home to generate their own electricity to power their appliances and vehicles.

Thank you.
Inge Mueller
