Jumpstarting building electrification

I support California moving away from methane and transitioning toward zero-emission homes and businesses. This will improve air quality and safety in our communities, and reduce the impact of man-made carbon pollution.

I urge the Commission to prioritize building decarbonization and identify more strategies that will jumpstart electrification.

It's clear that electrifying over 13 million homes and buildings across the state will take all hands on deck. The IEPR should help prompt a successful transition toward zero-emission buildings.
