Public Commnt Decarbonize Buildings

The recent U.N. climate change report stated at best we have 10 years to prevent the worst effects of climate change. We need a highly structured and efficient public plan to make our buildings on a green energy grid as quickly as possible. We need funding from the state general fund to make all government buildings energy efficient. All new building construction must be 100% green energy by law. We also need tax credits for small and medium sized business who may need assistance with making their buildings 100% green energy efficient.
