Support for the Building Decarbonization

Considering that we all have homes and buildings that we use on a daily basis, it is inevitable that these buildings are a huge source of climate pollution in California and as a resident, this makes me extremely concerned. This poses major risks not only to us but to our loved ones and we must make a change now.

I am writing this letter in support for the Building Decarbonization chapter of the Energy Commission's Integrated Energy Policy Report. We must work together in order to transition our homes and businesses off gas.

I represent a large part of the California population and I urge the Commission to prioritize building decarbonization and identify more strategies that will jumpstart electrification.

Thank you for listening to the people and ensuring the safety of this planet.

Kindly,

Jennifer Lopez
