Project across the street

Sept 2017 an agent of the DPR Construction Co. met with me to explain the project that was about to start. He said that it would be a 4 story building .. with landscape and trees in the front. That while the bldg. was going to be quite large, it would be beautiful with the landscape and curb appeal.

However, this past summer 2018, there was large drilling and large sputnik type of electrical equipment installed very close to the curb, where it had been described to be landscaped. Our facility runs sports programs for women, men as well as for children. We are concerned not only for the curb appeal that is obviously not going to happen, but that there are other concerns for the safety of being so close to these electrical power plant.

We were never made aware of changes to the original design or given a chance to have a voice in regards to the impact on our business.
