Subject: Campbell Cogeneration Project (93-AFC-3C)

Dear Mary Dyas:

Union Pacific Railroad Company notes that the project referenced above contemplates modifying the Campbell Cogeneration Project which would include maintenance to electric transmission lines that may parallel and/or cross the railroad's tracks at a number of locations. The information attached to your notice letter dated Dec. 14, 2018 and received Dec. 26, 2018 is insufficiently detailed to determine the actual proximity of this project to Railroad property or what, if any, impact the project may have on railroad operations and safety.

By this letter, Union Pacific requests further information to permit it to evaluate the proposal in light of railroad engineering standards and other considerations. The railroad reserves its rights to present comments on the proposal and to seek any legal, administrative, and other remedies that may be necessary to preserve Union Pacific's franchise and property rights.

Information and application forms concerning requests for wireline crossings over Union Pacific's property may be found on the internet at: www.uprr.com/reus/wireline/procedur.shtml. Usually, a proposed crossing that meets all railroad technical requirements and does not physically touch the railroad's property is processed routinely on pre-approved Union Pacific forms.

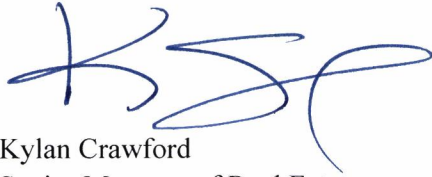

Proposals that call for placement of improvements on or under our property require greater evaluation and tend to be more difficult to approve, particularly where power lines parallel our tracks. Further information regarding requests for such encroachments may be found on the internet at: www.uprr.com/reus/encroach/procedur.shtml and www.uprr.com/reus/encroach/encguide.shtml. In all instances, there must also be a meeting of the minds on compensation for the right to cross the property.
