being only 1/2 of a full conceptual package

being only 1/2 of a full conceptual package it is imperative that we have the opportunity to contact some of the other attendees in order to complete a full design carbon free mixed use environment. We have on offer a disruptive new wind technology that is extremely compatible with any architectural design; we are looking to partner up with a developer or architect to meld a wind capture design with a wind conversion technology. Any one that is interested in further exploration please contact us.
