## Notice of Availability Vernon Public Utilities Integrated Resource Plan Filing

Senate Bill 350 (de León, Chapter 547, Statutes of 2015) requires publicly owned utilities (POU) with annual electrical demand exceeding 700 gigawatt hours to adopt integrated resource plans (IRP) by January 1, 2019. POU IRPs must be submitted to the California Energy Commission (Energy Commission) for review by April 30, 2019. POU IRPs submitted to the Energy Commission will be posted for 30 calendar days for public comment.

Upon receipt, the Energy Commission will review the IRP and determine whether it is consistent with the requirements of SB 350. The Energy Commission will consider requirements in the IRP Guidelines as well as public comment related to the consistency of the IRP with SB 350 requirements as part of its review and determination.

On January 10, 2019, Vernon Public Utilities (Vernon) submitted their complete IRP filing to the Energy Commission along with the four standardized reporting tables. The standardized reporting tables provide data on capacity and energy resources each POU plans to use and the projected progress towards greenhouse gas emission reduction targets. The reporting tables provide supporting information for Vernon's IRP.

Vernon's IRP Filing is posted on the Energy Commission's POU IRP webpage located here: <http://www.energy.ca.gov/sb350/IRPs/pous.html>.

The IRP Guidelines are located here:
