## **2018 IEPR Update**

Re: Final 2018 Integrated Energy Policy Report Update.

Thank you for your strong focus on the electrification of buildings. Electrification is the most viable path to zero-emission buildings. I urge the Commission to pursue the electrification goals in the IEPR in a manner that expediently accelerates the electrification market while prioritizing California's most vulnerable and disadvantaged communities. I urge the Commission to adopt the Final 2018 IEPR Update without any changes urged by the natural gas industry. Thank you for considering my views.

Sincerely,

John E. Douglas
