Description:	N/A
Filer:	Kinshuk Chatterjee
Organization:	Center for Sustainable Energy
Submitter Role:	Public
Submission Date:	3/28/2019 2:33:38 PM
Docketed Date:	3/28/2019

SMUD joins CALeVIP

The California Electric Vehicle Infrastructure Project (CALeVIP) is excited to announce that Sacramento Municipal Utility District (SMUD) is partnering in the Sacramento County Incentive Project to transform EV charging throughout the region. This new partnership will bring important opportunities to site hosts and service providers:

- Additional incentive funding
- New opportunities for marketing, education and outreach
- Technical support on utility service orders

What does SMUD partnership mean for site hosts?

This new partnership will change certain site eligibility requirements. Sites within SMUD territory will need to install an EV submeter to comply with SMUD requirements, but at no charge to customers. Applicants will also be required to release claims to any Low Carbon Fuel Standard (LCFS) credits dispensed for incentivized Level 2 chargers installed in SMUD territory. In turn, 100% of funds generated by the LCFS credits will be re-invested into the CALeVIP Sacramento County Incentive Project.
