### **Executive Director Determination on Pasadena Water and Power Integrated Resource Plan Filing Docket No. 18-IRP-01**

Senate Bill 350 (de León, Chapter 547, Statutes of 2015) (SB 350) amends section 9621 of the Public Utilities Code to require specified publicly owned utilities (POUs) to adopt integrated resource plans (IRPs) by January 1, 2019, submit them to the California Energy Commission, and update them at least once every five years thereafter.

IRPs are electricity system planning documents intended to ensure that POUs lay out the resource needs, policy goals, physical and operational constraints, and general priorities or proposed resource choices of an electric utility, including customer-side preferred resources. These plans will provide a framework to evaluate how utilities have chosen to align with greenhouse gas emission reduction targets as well as energy and other policy goals outlined in SB 350.

Pasadena Water and Power (Pasadena) submitted its IRP filing to the Energy Commission on December 20, 2018. Staff reviewed Pasadena's IRP filing for consistency with the requirements of public utilities code section 9621. Based on staff's review, the Executive Director filed a determination on April 17, 2019, finding Pasadena's IRP filing consistent with the requirements of SB 350. The Energy Commission plans to bring the determination to the August 2019 Business Meeting for adoption.
