## **Electrify the city NOW! We donâ€™t have time to waste!**

Dear Commissioners,

I am writing to express my strong support to electrify every building in the state. Besides facing an existential threat by climate change and our dependence on combustible fuels, we also must switch to a fuel source that wonâ€™t harm us or kill us with potential explosions and emissions. We must stop subsidizing any and all combustible fuels, including but not limited to oil, methane gas, biogas (also known as renewable natural gas), biomass and black liquor.

Every Californian deserves clean air inside and outside of their homes, and the only way to ensure that, is to electrify every building, incentivize the switch from fuel sources, ban the sale of any new gas appliance in the state, and safely decommission the aging and dangerous gas infrastructure throughout the state.

I would also urge the city to be bold and like in WWII to tell the public we need to reduce our usage and that goes for the businesses as well. There can be NO economy on a dead planet!
