## **Your project funding program is flawed**

I have been following your RFQ's;

I haven't seen any request for 'new ideas.' Instead, you are preoccupied with frivolous ideas that can only go a short distance without solving the energy and global warming problems for good. This means, you will never solve these problems, except coming up with some temporary patchwork of weak ideas.

You are therefore ignoring any new ideas that could solve the energy & global warming problems totally.

I have a patent pending idea that not only will eliminate fossil fuels for ever, it will also provide cheap & totally clean energy with no GHGs, anywhere electricity is used, even for jet engines. I can send you a slide presentation if you like.
