## **Redwood Coast Energy Authority support for public hydrogen refueling stations In North State**

The Redwood Coast Energy Authority, in our role as the lead agency on numerous multi-county low carbon transportation planning efforts in the North State, the community choice aggregator for Humboldt County jurisdictions, and as a joint powers agency representing Humboldt County local government entities, is eager to support hydrogen station developers. Example actions include:

- Facilitate engagement with relevant local government entities in the North Coast and Upstate regions
- Assist with permitting processes on a case-by-case basis
- Assist with securing fleet commitments
- Consider rate schedule negotiations for electrolytic hydrogen within Humboldt County
- Assist with site selection on a case-by-case basis

The Redwood Coast Energy Authority enthusiastically supports low carbon fuel options, and is eager to explore opportunities for hydrogen fueling infrastructure within our region.
