Docket Number: 19-IEPR-06

Please transition to all-electric building codes

Honorable Commissioners,

By the end of 2019 approximately 40% of Californians will live in a City or State with a reach code or policy timeline for transitioning to all-electric construction. Seattle's City Council has now introduced a natural gas ban based on that adopted in Berkeley. Your organization can lead or follow, but delaying the inevitable does no one any favors. I propose the 2022 Code ban gas in all new construction with a right-sized PV array on site. Please end this curse on our future, so we can have a livable planet.

Sincerely,
Sean Armstrong
Managing Principal
Redwood Energy
