Dear Docket Office,

Greetings,

The direction you are attempting to go for the SolarShares program appears to be shortsighted and least effort for you. Please remember that you are not an investor owned utility and both the State of California and your Solar participants are directing you toward a future with 100%renewable energy. You need rooftop solar, but you need to learn to manage rooftop solar. You MUST put good policy in place to get there. Instead of this shortsighted attempt to prevent rooftop solar why not incentivize new owners to adopt storage and start building out your utility scale battery that is desperately needed. Continue to adopt policy that incentivises renewable adoption AND helps your buildout.

The issues ahead are going to involve new management tools and new thinking. Please start building out battery storage in a big way now.

Thank you!

Sincerely,  
Gabor Leidenfrost  
Galt, CA 95632
