Docketed Date:	10/16/2019

Docket Number: 19-BSTD-02

Project Title: Residential Alternative Calculation Method Variable Capacity Heat Pump Modeling Approach

Document Title: 2019 Residential VCHP Software

Description: Download hyperlinks and other information related to the 2019 residential variable capacity heat pump (VCHP) research software.

CBECC-Res 2019.1.0 is available for download from the CEC software webpage:

https://ww2.energy.ca.gov/title24/2019standards/2019_computer_prog_list.html

This version of software includes the ability to test the variable capacity heat pump (VCHP) compliance option by selecting "VCHP – Meets requirements of the VCHP compliance option" as the heat pump system type.

The VCHP functionality is for research purposes only and CANNOT be used to show compliance. The CF1R document can be generated but will be watermarked "Not Useable For Compliance".
