# Draft Production Cost Model Common Case Select Results

---

## **2019 Integrated Energy Policy Report California Energy Commission**

**Presenter: Angela Tanghetti**  
**Supply Analysis Office, Energy Assessments Division**  
**California Energy Commission**  
**Date: October 30, 2019**

# Topics

---

- IEPR Draft Common Case Overview
- Load Forecast for California (CED 2019 Preliminary)
- Load Forecast for rest of Western Electric Coordinating Council WECC (Unchanged from April 22)
- Significant Retirements / Additions (Unchanged from April 22)
- Updated Hydro Generation Input (Unchanged from April 22)
- Natural Gas Prices (Updated based on April NAMgas results)
- Select Simulation Results – Draft results compared with April 22
  - Natural Gas Demand for Electric Generation
  - GHG Emissions Projections

# 2019 IEPR Preliminary Common Case Assumptions

Common Case	CED 2019 Preliminary Load Forecast	Natural Gas Price	Energy Efficiency* 2018 IEPR Update	RPS Target
High Energy Consumption	High	Low	Low AAEE	60% by 2030
Mid Energy Consumption	Mid	Mid	Mid AAEE	60% by 2030
Low Energy Consumption	Low	High	High AAEE	60% by 2030

\* Adjusted for committed component of AAEE

# Load Forecast California and Rest of WECC

- California Loads – CED 2019 Preliminary
  - Approximately 5% lower than IEPR 2018 Update

# WECC Wide GHG Emissions

## 2019 IEPR Draft and 2019 IEPR April Results

WECC Wide GHG Emissions (Million Metric Ton)			
WECC Wide	2020	2025	2030
2019 IEPR Draft Low	240	222	202
2019 April Mid	252	242	230
2019 IEPR Draft Mid	241	231	219
2019 IEPR Draft High	249	241	234

2019 IEPR Draft WECC wide GHG emissions differ from 2019 IEPR April

- ✓ Less near-term variability between Mid, Low and High burner-tip gas price projections
- ✓ Less gas to coal generation switching in both long-run and near-term due to less variation between the coal and gas burner-tip gas price projections
