SB 100 CPUC Workshop

Jose Torres

Key Questions

- How should the SB 100 report approach and address system and local reliability? What key factors should be considered?
- How should issues around equity (environmental, economic, social) and affordability be addressed?
- How should land use planning issues be considered?
- Other challenges or considerations?

How should the SB 100 report approach
and address system and local reliability?
What key factors should be considered?

How to Budget For Utilities

The typical US family spends at least **\$2,200** per year on energy bills.

An infographic with a teal background. On the left, a stylized orange hand in a dark blue suit sleeve holds a glowing white lightbulb. Inside the lightbulb is a black dollar sign (\$). To the right of the hand, the title 'How to Budget For Utilities' is written in large, bold, black sans-serif font. Below the title, a white-bordered box contains a small black icon of a family (two adults and a child) followed by the text 'The typical US family spends at least \$2,200 per year on energy bills.' The dollar amount is in bold.
