SB 100 Scoping Plan--My comments 11-12-19

We need to reduce carbon emissions as quickly as possible.

- * Urge and facilitate electrification of all sectors including transportation, buildings, and industry.
- * Incentivize the development of distributed energy resources including solar, wind, storage and demand response
- * Incentivize and facilitate energy efficiency in all sectors..
- * Reform the Transmission Access Charge so that it applies only to energy that uses the high-voltage transmission system.
- * Siting utility-scale renewable generation and storage must be done in an environmentally-protective manner.
