California Energy Commission,

Every new roof without solar is a major missed opportunity to lock in pollution-free solar energy. I strongly urge you not to retreat from this important program, and require solar installations on every new rooftop in California.

Sincerely,

Sincerely,  
Mary Mortell

California Energy Commission,

Giving options reduces the likelihood of success. Adding solar panels to EVERY single new home could increase California's solar capacity 22 percent by 2045. This is like cutting carbon emissions from 100,000 cars.

California NEEDS to lead on these sort of measures. Even if alternative energy improves over the next 20 years, as I'm sure it will, this requirement will be a foundation.

Every new roof without solar is a major missed opportunity to lock in pollution-free solar energy. I strongly urge you not to retreat from this important program, and require solar installations on every new rooftop in California.

RE: Docket 19-BSTD-08: California Needs Solar Roofs

null

California Energy Commission,

Every new roof without solar is a major missed opportunity to lock in pollution-free solar energy. I strongly urge you not to retreat from this important program, and require solar installations on every new rooftop in California.

Sincerely,

Sincerely,  
Sarah Sismondo
