Dear CEC Administrators:

We appreciate the opportunity to comment to the California Energy Commission regarding 18-HYD-04, Draft Solicitation Concepts for Light-Duty Hydrogen Refueling Infrastructure.

In regards to Milestone 1:

The applicant shall participate in an in-person, pre-application meeting for permits to build and operate each proposed hydrogen refueling station, with the AHJ.

It has come to our attention, after having dialogue and submitting all necessary documents, some AHJ's feel that a pre-application meeting is not necessary. This is a result of the AHJ's opinion, that the hydrogen refueling station is a straightforward addition to mechanical equipment and that there would be no change of use needed. Therefore, we are requesting clarification from the CEC to understand if submitting this correspondence will be deemed acceptable in lieu of a physical pre-application meeting to satisfy Milestone 1; with all supporting documentation.

I appreciate your time and clarification.

Best regards,

Steven Brooks
