Docket Number: 19-BSTD-06

Consumers Decide

Allowing local ordinances to dictate energy choices for consumers isn't in their best interest and will result in higher consumers cost and business disruption.

Markets and consumers rather than central planning by politicians and bureaucrats is what's been proven effective for centuries.

Ideology and government force is no substitute for consumers making rational choices.

I urge the CEC to deny "Local Ordinances Exceeding the 2019 Energy Code" using state preemption as a guide.
