Please Support Strong Reach Codes

Dear Commissioners,

Please support strong Reach Codes being adopted by forward looking cities and view them as the experiments that will help you to decarbonize new construction in the next building code update. As a long time energy engineer and Environmental Quality Commissioner for Menlo Park, I'm very proud of our staff's innovative approach to Reach Codes and I was delighted to see other cities leap frog us and make improvements beyond our first efforts. These Reach Code efforts are generating hope in the state and I look forward to your continued progress with them.

Best regards,
Tom Kabat
