FEB 05 2020
STATE CLEARINGHOUSE Revised 2011

Attachment 1 to NOD

Project Description:

The applicant submitted a small power plant exemption (SPPE) application to the California Energy Commission (CEC) for the proposed Laurelwood Data Center (LDC) at 2210 Laurelwood Road in Santa Clara, California. The LDC would consist of two multi-storied data center buildings and 56 3.0-megawatt (MW) standby backup diesel-fired generators capable of providing electrical power during utility outages or certain onsite electrical equipment interruption or failure. The maximum electrical load of the LDC would be up to 99 MW, inclusive of tenant-installed information technology (IT) equipment at the LDC and cooling and ancillary electrical and telecommunications equipment operating to support IT equipment. The LDC would also include an onsite 60-kilovolt substation with an electrical supply line that would connect to a Silicon Valley Power distribution line located 0.1 mile west of the LDC. To make way for the project, demolition and removal of asphalt/foundations and underground utilities would be necessary, prior to construction. The CEC has exclusive permitting authority under the Warren-Alquist State Energy Resources Conservation and Development Act (Warren-Alquist Act) to approve or deny, applications for the construction and operation of thermal power plants that will generate 50 MW or more of electricity. The SPPE process allows applicants with thermal power plants between 50 and 100 MW to obtain an exemption from the CEC's jurisdiction and proceed with local approval rather than requiring certification by the CEC.
