IN THE MATTER OF:

*Imperial Irrigation District
Emission Performance Standard
Compliance Filing*

Docket No. 20-EPS-01

I. INTRODUCTION

Pursuant to Public Utilities Code section 8341(e)(1), the Energy Commission established a greenhouse gases emission performance standard (EPS) of 1,100 pounds carbon dioxide per megawatt hour, as codified in Title 20 of the California Code of Regulations, section 2900 et seq. The Energy Commission is responsible for reviewing all long-term financial commitments entered into by local publicly owned electric utilities for compliance with the EPS.

II. FINDINGS

- a. On January 22, 2020, the Imperial Irrigation District (IID) submitted a compliance filing requesting that the Energy Commission find that IID's Power Purchase Agreement with Hell's Kitchen PowerCo 1, LLC for electricity from the proposed Hell's Kitchen geothermal facility be determined to be compliant with the EPS;
- b. Energy Commission staff reviewed IID's filing and found it complete. Based on its review, staff recommended that the procurement be found to be in compliance with the EPS; specifically, staff concluded that the facility listed in the PPA is determined to be compliant with the EPS under section 2903(b)(1) of the Public Resources Code; and
- c. The Energy Commission concurs with staff's recommendation that IID's compliance filing is complete and that the contract with Hell's Kitchen PowerCo 1, LLC, as described in the compliance filing, complies with the EPS.

III. CONCLUSION AND ORDER

The California Energy Commission hereby adopts staff's recommendation and orders that the long-term financial commitment described in IID's compliance filing complies with the Energy Commission's Greenhouse Gases Emission Performance Standard, as

codified in Title 20 of the California Code of Regulations, section 2900 et seq. Should the final facility design significantly change from the specifications provided in the compliance filing, IID must submit a subsequent compliance filing providing the updated information.
