## **More Hydrogen stations are needed**

Hi, we currently drive a Hydrogen Fuel Cell Electric Vehicle. It has been really awesome to drive this car. However lately both stations in my neighborhood (La Cañada & South Pasadena) have been running empty every day under normal demand. So it would be fantastic if CEC could please speed up the funding for more Hydrogen stations as well as stations with bigger capacity! We decided to lease our Honda Clarity FCEV when we were renting a house. That house had old electric wiring, so we could not install a home Fast Charger for a BEV. So a Hydrogen Fuel Cell Electric Vehicle was the only zero emission option for our transportation needs. My point here being that a lot of people in California rent their homes, and that might prevent them from using a Battery Electric Vehicle. Hydrogen FCEVs aren't just some fancy stuff for rich people, it really does enable a lot more people to go zero emissions! I hope you go full force with funding new hydrogen stations!
