Add more hydrogen stations and decrease price per kg

I am an owner of a 2019 Nexo and I would like to see the following improvements in the hydrogen distribution network in the coming years:

- 1/ an increase in the number of stations across the Los Angeles area, particularly more on the East and North sides (Pasadena area),
- 2/ an increase in the availability of Hydrogen at the current H2 stations (we often face a shortage of hydrogen after 2 pm)
- 3/ a decrease in the cost of hydrogen to bring it on par with gasoline on a per-mile basis.
