## **More infrastructure**

As my wife and I enter our 7th year of driving FCEV vehicle (Tucson, Mirai, now Nexo). It would sure be nice to see us finally hit the 100 stations that was promised to be at the end of the 2 year plan, - 7 years ago.

We keep driving them because we believe it. Not in the free fuel or the HOV stickers, but for the clean air and sustainable strategy. But this strategy is stuck in starter mode due to lack of infrastructure expansion. Other countries as passing us by dramatically. I realize we are only california, but we are the 5th largest economy in the world last time I looked, so we should be able to do more. What ever happened to the billion or so that was going to be California's cut of the VW settlement. Lets use some of that money.
