NOTICE OF REMOTE-ACCESS
PUBLIC WORKSHOP

RE: [Senate Bill \(SB\) 1000 Electric
Vehicle Charging Infrastructure
Deployment Assessment](#)

Notice of Senate Bill 1000 Workshop

California Energy Commission (CEC) staff will host a remote-access public workshop to solicit stakeholder feedback on the CEC's proposed methodology and preliminary analysis for the *Senate Bill 1000 Electric Vehicle Charging Infrastructure Deployment Assessment*. The statute requires the CEC to assess whether light-duty charging station infrastructure is disproportionately deployed by population density, geographical area, or population income level, including low-, middle-, and high-income levels.

The workshop will be held remotely, consistent with Executive Orders N-25-20 and N-29-20 and the recommendations from the California Department of Public Health to encourage physical distancing to slow the spread of COVID-19. The public can participate and observe the workshop consistent with the direction in these Executive Orders. Instructions for remote participation are below.

June 4, 2020

1:30 p.m. – 4:30 p.m.

Remote Access Only

Remote access is available by computer or phone via [Zoom](#).™
For details, go to the [CEC Zoom page](https://energy.zoom.us/) at <https://energy.zoom.us/>.

Agenda

1. Introductions
2. Overview of Senate Bill 1000 and the Clean Transportation Program
3. Proposed Methodology
4. Preliminary Analysis

5. Public Comment, Questions and Discussion

Background

In September 2018, SB 1000 (Lara, Chapter 368, Statutes of 2018)¹ was signed by former Governor Edmund G. Brown, Jr. The statute states that “the commission [CEC], in consultation with the State Air Resources Board, shall, as part of the development of the plan prepared pursuant to Section 44272.5 of the Health and Safety Code², assess whether charging station infrastructure³ is disproportionately deployed by population density, geographical area, or population income level, including low-, middle-, and high-income levels. This includes whether direct current fast charging stations are disproportionately distributed and whether access to these charging stations is disproportionately available. Upon making a finding that charging station infrastructure has been disproportionately deployed, the commission shall use moneys from the Alternative and Renewable Fuel and Vehicle Technology Fund [also known as the Clean Transportation Program], to the extent authorized by law, as well as other mechanisms, including incentives, to more proportionately deploy new charging station infrastructure, unless the commission makes a finding that the disproportionate deployment is reasonable and furthers state energy or environmental policy as articulated by the commission.”
