**IMPERIAL IRRIGATION DISTRICT  
RESOLUTION NO. 32-2014**

**RESOLUTION OF THE BOARD OF DIRECTORS TO INITIATE A PROCESS TO  
DETERMINE APPROPRIATE TARGETS, IF ANY, FOR THE PROCUREMENT OF  
ENERGY STORAGE PURSUANT TO CALIFORNIA ASSEMBLY BILL 2514**

**WHEREAS**, the Imperial Irrigation District supports the development of renewable energy generation projects, including geothermal, wind, solar and biomass, within its energy service territory, as such development is beneficial to both the local community and greater region; and

**WHEREAS**, the state of California has declared that expanding the use of energy storage systems can reduce costs to ratepayers, reduce emissions from fossil fuel generation and enable and accelerate the implementation of more renewable generation and it's integration in California's electrical system; and

**WHEREAS**, Assembly Bill 2514 was enacted September 20, 2010, requiring the governing board of a locally publicly owned electric utility, including IID, by March 1, 2012, to open a proceeding to determine appropriate targets, if any, for the district to procure viable and cost-effective energy storage which shall be reevaluated every three years; and

**WHEREAS**, AB 2514 requires the IID Board of Directors, as the governing board of IID, to adopt an energy storage system procurement target, if determined to be appropriate, by October 1, 2014; and

**WHEREAS**, the legislation requires that adopted targets be achieved by the district by December 31, 2016 with a second target to be achieved by December 31, 2021; and

**WHEREAS**, the IID Board of Directors, as the governing board of IID, initiated a proceeding to determine appropriate targets, if any, to procure energy storage systems in compliance with the provisions of AB 2514 on February 14, 2012; and

**WHEREAS**, the IID is committed in its resolve to provide reliable, efficient and affordably priced energy service; and

**WHEREAS**, IID has initiated significant planning of physical improvements to help insure reliability pertaining to its operation of the bulk electric system; and

**WHEREAS**, these improvements, consisting of but not limited to, IID's strategic transmission expansion plan, battery storage, new 500-kV transmission paths and a fortified 230-kV loop within the district's service territory, are of top priority for the district; and

**WHEREAS**, IID's battery storage project will be completed by December 31, 2016, pursuant to its agreement with the Federal Energy Regulatory Commission, separate and independent from the provisions within AB 2514.

**NOW, THEREFORE, BE IT RESOLVED** that the IID Board of Directors hereby adopts a target of "0" MW of energy storage as it relates to AB 2514.

**BE IT FURTHER RESOLVED**, that IID shall reevaluate these energy storage procurement targets within three years to determine procurement targets, if any, to be achieved by December 2021.

**PASSED AND ADOPTED** this 23<sup>rd</sup> day of September 2014.
