WebEx recording link of the May 22, Commissioner Workshop on Building Decarbonization: Opportunities and Challenges of Building Sectors, 19-DECARB-01

The California Energy Commission (CEC) conducted a public workshop to discuss and gather input on the Building Decarbonization Assessment required by Assembly Bill (AB) 3232 (Freidman, Chapter 373, Statutes of 2018). The workshop included presentations and panel style discussions on the opportunities and challenges to decarbonize residential and commercial buildings. Panelists include representatives of utility companies, financing organizations, building developers, construction trade associations, and non-government organizations.
