Peterson CAT applauds this initiative - we are a leader in Microgrids!

Peterson CAT, one of the leading Caterpillar Dealerships in the supply of power solutions commends the CEC, CPUC and CAISO for holding this workshop to collectively explore the role and intrinsic value of Microgrids. As a leader in the microgrid space, Caterpillar has been supplying microgrids around the world for over 75 years. As California continues its leadership with renewable energy, electric vehicle adoption and electric system decarbonization, Peterson CAT looks forward to working with stakeholders to ensure that all Californians enjoy the benefits inherent from the wide scale adoption of microgrids.
