Anwar and Carol,

To further support the peregrine falcon observations and failed egg(s) identified during weekly DB surveys and MCRs, please see the emailed note today from the DB which indicates there is not an active nest or fledglings at Encina Power Station.

Please let us know if there are any other questions or concerns.

Subject: EPS Monitoring - Peregrine falcons

Hi Tim,

Over the past few monitoring visits, no additional nesting behaviors have been observed in the peregrine falcon pair. No fledglings have been observed during this nesting season either. Please let me know if you have any additional questions.

Thanks,
Melissa
