Wind power generation

Most precious resource in Big Sur/Monterey Bay Marine Sanctuary is the unadulterated visual experience. Protection is the top priority for future generations. Energy production also is essential, so a sensible approach is crucial. Compatible ocean exploitation must not be seen and absolutely clean. Tall towers ,whether for oil production or wind generators, are forbidden. Maybe a new approach in/for the future could be ocean currents or low profile turbines playing a part. But for the actual Big Sur horizons, keep this free from encroachment. South areas near Diablo & Morro Bay already have energy development components. Do not expand northward.
