Public Comment - Item 6 Local Ordinance Applications

I strongly support the adoption of these commonsense reach codes. I also strongly urge the CEC to at last build off local leadership and take electrification further by setting an all-electric baseline for new construction in the 2022 building code. A good baseline would be 100% because, in case you haven't noticed, the ability of the planet to support life is being destroyed and "natural gas" (methane) pours carbon into the atmosphere at every step of the way.

Thank you,
Ellen Koivisto
San Francisco
