## **Great Oaks South Project 20SPPE01 Safety**

I am very concerned about what this project will do to the safety of our neighborhood, specifically air quality and hazardous material being stored so close to a residential area. My neighbor, Nick Renna has completed a very thorough document outlining concerns. I am in total agreement. I would like to see the studies that suggest this is safe in our neighborhood? We attended a ZOOM call last Friday with our councilman Sergio and members of the various groups responsible for managing this project. Patrick from the planning group said this was in fact not sent out to within 1000 feet, which is what they normally do, but 500 feet, which he said was an error, so when this project was approved in 2017, none of us in the immediate area were notified. As I write this, we are experiencing rolling black outs, which only furthers our concerns about having all of these diesel generators running in our neighborhood. We would like our concerns addressed, please let me know who can speak to this. Thank you!
