RESOLUTION NO. 2020- 099

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ANAHEIM ADOPTING AN ENERGY STORAGE PLAN AND DETERMINING THAT A PROCUREMENT TARGET OF UP TO 50 MEGAWATTS OF ENERGY STORAGE SYSTEMS BY DECEMBER 31, 2026 IS APPROPRIATE SUBJECT TO CITY COUNCIL AUTHORIZATION FOR FUTURE CAPITAL EXPENDITURES AND AUTHORIZING THE PUBLIC UTILITIES GENERAL MANAGER OR DESIGNEE TO PREPARE, EXECUTE, AND SUBMIT DOCUMENTS AND TAKE SUCH ACTIONS AS NECESSARY IN CONNECTION WITH THE DETERMINATION MADE HEREUNDER.

WHEREAS, California Public Utilities Code section 2836 (Assembly Bill 2514) requires the governing boards of each publicly-owned utility, including the City of Anaheim (Anaheim), to determine any cost-effective and viable energy storage (ES) technologies for its utility systems, to set procurement targets by October 1, 2014, and to reevaluate the determinations no less than once every three years; and

WHEREAS, on August 12, 2014, the City Council approved Resolution No. 2014-146 in which it was determined that the adoption of procurement targets for energy storage systems for either December 31, 2016 or December 31, 2021 was not appropriate at that time as commercially available ES technologies were not cost-effective energy storage system options that would significantly improve system reliability; and

WHEREAS, on September 26, 2017, the City Council approved Resolution No. 2017-142 which set an ES procurement target of (a) 1 MW for a pilot project to be completed by December 31, 2021; and (b) up to 10 MW to be completed by December 31, 2026 depending on the results of the pilot project and future ES technologies, subject to City Council authorization; and

WHEREAS, the Energy Storage System Plan dated July 2020 (the "Energy Storage Plan"), which is attached to the staff report accompanying this resolution, lays out the Department's reevaluation of ES systems and contains its findings; and

WHEREAS, the Energy Storage Plan notes the continued growth in solar and wind generation and the increased price volatility in the energy market and finds that, with declining costs, ES system technologies provide a viable solution for a more robust and reliable energy supply.

NOW, THEREFORE, BE IT RESOLVED by the Anaheim City Council as follows:

1. The findings set forth above and within the Energy Storage Plan are hereby adopted by the Anaheim City Council.

2. Based on the foregoing, the Anaheim City Council determines that the following procurement targets are appropriate, feasible, and cost-effective: (a) 0 MW of energy storage by December 31, 2021; and (b) up to 50 MW of energy storage by December 31, 2026, subject to City Council authorization.

3. The Anaheim City Council authorizes the Public Utilities General Manager, or designee, on behalf of Anaheim, to prepare, execute, and submit any documents and take such actions, as necessary, in connection with the determination made hereunder.

THE FOREGOING RESOLUTION is approved and adopted by the City Council of the City of Anaheim this 25th day of August, 2020, by the following roll call vote:

AYES: Mayor Sidhu and Council Members Faessel, Barnes, Brandman, Moreno, Kring, and O'Neil

NOES: None

ABSENT: None

ABSTAIN: None
