Candee Electric  
An ATT Technician

**Role:**

- As an ATT Technician, it's my role to make sure that a permitted job site meets the requirements of Title 24 certification process.
- We do the leg work for onsite of each permitted project.

**Quality:**

- Verify that the products installed on the job site are accurate for the Title 24 Lighting codes.
- Verify that the lighting, switches, control product works correctly.

**Improvements:**

- ATT Technician dose field survey and necessary changes on job sites. To verify and override any details, to qualify for the Title 24.

**Engineers:**

- Engineers work off Cad software which are not currently up to date.
- Drawings that are cut and paste by their apprentice, and dose little checking currently of Title 24 Code's.
- Not All Engineers do job walks to verify spec's to Title 24 Code's.
- Engineers never want to accept our phone calls or emails in a timely manner.

**Design:**

- An ATT Technician can layout accurate code requirements for Title 24 for Architects and Engineers.
- Review mistakes from Architects, Engineers, and their apprentices.
- To follow through of the design, checks and balances.

**Conclusion:**

- ATT Technicians override engineer's drawings.
- Verify current Title 24 Code's.
- ATT Technicians respond faster on calls, emails, and communications.
- Don't have to rely on cad software drawings that are not to kept currently to Title 24
- ATT Technicians wouldn't have to recorrect all the problems that are currently in the drawing.
- Override all the mistakes that was never done to begin with from Architects and Engineers.

- To minimize the overhead, loss of time, and loss of expense to recorrect the product design of the blue prints.
- Save cost on product and materials.
- To move forward of completing the job.
- Help the onsite Sub Contractors to finish their job contracts on time.
- Meet deadlines faster for permitted jobs.

Thank you:

Tim Candee
