Peter Davis re Item 5 Local Ordinances

Additional submitted attachment is included below.

Dear CEC Member,

I am writing to express my strong support for adoption of these reach codes. We have a very limited window of time in which to take significant action to decarbonize the world's energy system. Decisive action by the CEC in support of electrification of California's grid by setting an all-electric baseline for new construction in the 2022 building code will represent a much needed action in addressing the existential threat represented by the climate emergency we are currently witnessing. Thank-you for taking bold action at a time when is is most needed.

Sincerely,

Peter Davis
