

DOCKETED

Docket Number:	19-BSTD-03
Project Title:	2022 Energy Code Pre-Rulemaking
TN #:	234644
Document Title:	Dan Pohnert - AECOM Comments - on Title 24 Revision
Description:	N/A
Filer:	System
Organization:	Dan Pohnert - AECOM
Submitter Role:	Public
Submission Date:	9/9/2020 1:49:42 PM
Docketed Date:	9/9/2020

Comment Received From: Dan Pohnert - AECOM
Submitted On: 9/9/2020
Docket Number: 19-BSTD-03

on Title 24 Revision

Additional submitted attachment is included below.

From: [Pohnert, Dan](#)
To: [Energy - Docket Optical System](#)
Cc: [Donelson, Mike@DCA](#)
Subject: Title 24 revision 19-BSTD-03
Date: Wednesday, September 9, 2020 11:57:54 AM
Attachments: [image001.png](#)
[TN234640_20200909T103416_Candee Electric Comments - ATT involvement of Title 24.pdf](#)

CAUTION: This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

I take great exception to the self-serving characterization of the registered design professional by non-registered technicians.

Engineers:

- Engineers work off Cad software which are not currently up to date. [False and mis leading CAD software is part of the standard of care and due diligence](#)
- Drawings that are cut and paste by their apprentice, and dose little checking currently of Title 24 Code's. [False adaptation is required by standards of care](#)
- Not All Engineers do job walks to verify spec's to Title 24 Code's. [False Required by standard of care and due diligence](#)
- Engineers never want to accept our phone calls or emails in a timely manner. [False I have yet to find my associates to no respond to request for issues involving permitting](#)

Design:

- An ATT Technician can layout accurate code requirements for Title 24 for Architects and Engineers. [False engineer is required to prepare drawing under current Codes](#)
- Review mistakes from Architects, Engineers, and their apprentices. [Assumes designer of record is always in error](#)
- To follow through of the design, checks and balances. [Part of designer of record due diligence](#)

Conclusion:

- ATT Technicians override engineer's drawings. [Overrides the engineer of record's engineering judgement](#)
- Verify current Title 24 Code's. [Part of designer of record due diligence](#)
- ATT Technicians respond faster on calls, emails, and communications. [Not always true](#)
- Don't have to rely on cad software drawings that are not to kept currently to Title 24. [How is the ATT software different than the engineer's software?](#)
- ATT Technicians wouldn't have to recorrect all the problems that are currently in the drawing. [Assumes designer of record is always in error](#)
- Override all the mistakes that was never done to begin with from Architects and Engineers. [Assumes designer of record is always in error](#)

I find these statement bordering on slander of the designer of record. They only serve to promote unlicensed individuals to interject and interfere with the legitimate responsible charge of engineering as required by law . I find such power grabs by unlicenced professionals as an attack on the established legal responsibilities of the registered professional engineer.
