1100% Clean Electricity by 2030

In this pre-season of already-unprecedented wildfires it becomes clearer than ever, under our smoky skies, that we need prompt and serious action to address the Climate Crisis, which is the engine driving the steep increase in fires. We can achieve 100% clean electricity by 2030, instead of 2045, and we need to do that! Please work ceaselessly toward this goal!
