100% Clean Energy by 2030

There is nobody in the state of California who hasn't been touched directly by the way in which climate change serves as a threat multiplier, turning fires into mega-fires, bad air into horrific air, systemic racism into a mega environmental justice issue, etc. I urge you to act NOW, charting a path to 100% Clean Energy by 2030. 2045 will be too late. Climate crisis is here and now.

We can and will do this work together, state and local governments, state and local climate action groups, working together with the people to get this done, for the sake of our children and youth who deserve a livable future, on behalf of the natural world that we must honor and protect, and on behalf of all life.
