The water and wastewater systems at California's disadvantaged communities can now be controlled using a low-cost, shared, Cloud SCADA® Platform by XiO. The XiO platform does not require any local computers and sends water system alarms to any number of regional operators for attention.

By eliminating the need to set up a local SCADA control room and servers at each community, XiO is achieving significant economies of scale for community water agencies.

Please let me know if you would be interested in discussing how XiO's next generation technology solution can enable communities to pool their resources and utilize Cloud technology to implement a shared control system to dramatically reduce the cost of operating water and wastewater systems.

Regards,

John Peairs | 415-720-3039 | [johnp@xiowater.com](mailto:johnp@xiowater.com)
