Comment for Docket # 19-BSTD-12
Town of Truckee Petition to Solar PV Requirement

Comment From:
Anne-Flore P. Dwyer

I am writing in regards to the Town of Truckee Petition for an exemption of the CEC PV Requirement in support of the CEC staff Preliminary Conclusions provided on 8/20/2020.

As a practicing Architect in the Truckee region I support the CEC stance that the existing codes provide sufficient guidance and process for each project to review specific conditions and determine if it is not possible to locate solar panels on a building.

It has by my experience that many sites, with the proper design, can accommodate the solar panels, including safety concerns and snow load concerns raised in the Town of Truckee application.

I urge the C.E.C. NOT to grant this application for a general exemption.

Furthermore, if an exemption were to be considered an alternate means of addressing impacts of equivalent GHG emissions for any new residence using the exemption should be required.

Thank you,
Anne-Flore P. Dwyer
