Equinix Data Centers

Was there an arborist report done? Was there an ornithology report completed? According to the CEQA regulations, there should have been a 4 x 6 sign providing public notice, but there was no billboard or public notice. My family and I have lived here in the neighborhood for 23 years, and I feel Mr. Galati is minimizing the size of the project, the impact to our neighborhood and the environment. Mr. Galati is minimizing the diesel fumes and the potential impact to our environment. The generators are refueled on a regular basis by fuel trucks and diesel gets spilled all the time and flows into the storm drains. He also minimizes the noise factors - untrue. I am more disappointed that the public was not give proper notice when this project was submitted and eventually approved. There are clear violations of California regulations according the California Environmental Quality Act (CEQA). Thank you for your time and I would like to know when the next public forum/meetign will be about this monstrous project.
