Email to Sergio Jimenez

I have attached an email to our District CouncilMember Sergio Jimenez in hopes he will recognize the discrepancies and errors in Equinix's application and approval process for their massive three data centers and small power plant of thirty-six (36) generators in our neighborhood. I am referencing the recorded zoom meeting he was on with City of San Jose Planning and Development representatives and CEC Public Advisor's representative, RoseMary Avalos.
Thank you.

Additional submitted attachment is included below.

Dear Mr. Jimenez,

I recently viewed the recorded zoom meeting regarding the Great Oaks South Bay Equinix Data Center and Small Power Plant project with you and your staff, Nick Renna and Lisa Campbell, the City of San Jose Planning and Development, and RoseMary Avalos, Public Advisor's Office. I appreciate you taking the time to set up the zoom meeting and working with members of our community.

I am forwarding you a letter that I emailed to Rosalynn Hughey, Robert Manford, and Tim Rood at the City of San Jose Planning and Development Department. Like many of my neighbors, I am deeply disturbed and angered by the negligence and disregard for our neighborhood and community. This Equinix project was approved **without the mandated public notice and community outreach**, and we are only now becoming aware of this massive data centers and small power plant project. In addition to the City of San Jose Planning and Development Department's and the applicant's apathy and indifference for our neighborhood, there are obvious code violations with this project.

As our District CouncilMember, I am asking you and your office to represent and facilitate our fight against this behemoth project and its negative impact on our community and environment. Please help us protect our families, our neighborhood and our community.

My neighbors are willing to meet in person (socially-distanced and with masks) or via zoom or conference call. Please let us know what works best for you and your office. I look forward to hearing from you as soon as possible.

Best,
Mimi Patterson
