AR Green Consulting Comment re 2022 Energy Code Pre-Rulemaking

Dear CEC committee,

I am writing in support of stronger requirements to decarbonize new construction.

My firm has worked in many green buildings and I strongly advocate for all-electric new construction. It is not only reachable with the new technology, but it can also be less expensive (no dual energy infrastructure), more flexible in the design, promotes grid resiliency and adaptability, it is safer (less chances of gas explosions), and it brings undisputable benefits to help fight climate change and its dangerous effects to both the environment and the human race.

Thank you,

Adhamina Rodriguez
