Elimination of propane, fossil fuels, et al

After reviewing the text of the proposed 2022 Standards and Gov. Newsomes proclamation to outlaw fossil fueled vehicles, etc. with the no infrastructure able to replace said items, I do believe it is time for a ballot initiative to curtail the CEC's powers granted by the state legislature. We the people have that right.

It is my opinion after some 30 odd years watching silently reading watching, working with the folks at the CEC hotline (great bunch of people) the idiotic and sometimes ludicrous proposals that have made it into the energy code that it is time for the people of the state to issue their referendum on what is being proposed vs what actually has merit, from Solar power, its true costs and maintenance, water heaters to the banning of fossil fuels to the carbon tax. It is time to vote.

Sincerely, Greg DAvis, PE M29759
