Home Front Build Comment on 2022 Energy Code Pre-Rulemaking

Hello

We are a design/build firm in Los Angeles and currently design all our projects as all-electric homes. We have proven that this makes sense financially as well as for reducing the effects of climate change. This is a critical issue and it needs to be implemented. Thank you.

The car industry has seen the future and is heading in an all-electric direction. The building industry needs to catch up.

Stephen Pallrand
